Jena, 3. April 2018

### Confirmation of research visit of Ass.-Prof. Dr. Yiruy Vikhot

Dear Mr. Vikhot, dear Yuriy,

It is my pleasure to confirm your stay within the Project Erasmus<sup>+</sup> at the Friedrich-Schiller University of Jena from February 12 to February 23, 2018 in Jena, Germany (12 days).

I am also glad to confirm that you have attended my short course on Balanced Cross Sections with great interest. The course took place from February 12 to February 16, 2018, at the Institute of Geological Sciences of the Friedrich-Schiller University of Jena (Burgweg 11, 07749 Jena).

Next to this, you have also worked very autonomously in our vitrinite-reflectance laboratory on characterising coal types on your own sample material. I also confirm that we have had numerous discussions on intensifying a possible bilateral collaboration between your institute at the Ivan Franko National University of Lviv, and the Institute of Geosciences at the University of Jena.

I would be very happy if we remained in contact and if any of our intentions for a more formal bilateral collaboration between our universities would be supported by our respective universities.

With my best wishes,

Kamil Ustaszewski
